

A MOON TOUR NOT TO MISS!

Visit the Victoria Falls Parks Rainforest on the dates indicated below and enjoy magical unforgettable night experience in a guided moonlight viewing tour of the Falls. For three nights each month (one on either side of the actual full moon date) the Rainforest is open for a dramatic lunar rainbow – a rare natural phenomenon (also known as a moonbow or lunar bow or white rainbow) produced by the moon. You thought it is only the sun that produces the solar rainbow? This spectacular tour begins at the Danger Point coming back towards the Livingstone Statue; a real reverse of the daylight tour. One thrilled tourist aptly describes the appearance of the falls “...like a big curtain beamed upon a giant luminous projector.”

Lunar Rainbow Tours/Moonlight viewing Days for the Rainforest, 2009

Jan	10, 11, 12
Feb	8, 9, 10
Mar	10, 11, 12
